1 The use of multithreading for exception handling

Craig B. Zilles, Joel S. Emer, Gurindar S. Sohi

November 1999 **Proceedings of the 32nd annual ACM/IEEE international symposium on Microarchitecture**

Additional Information: full citation, abstract, references, citings, index terms

Common hardware exceptions, when implemented by trapping, unnecessarily serialize program execution in dynamically scheduled superscalar processors. To avoid the consequences of trapping the main program thread, multithreaded CPUs can exploit control and data independence by executing the exception handler in a separate hardware context. The main thread doesn't squash instructions after the excepting instruction, conserving fetch bandwidth and allowing execution of instructions inde ...
